

KYLE REIDY

(415) 539 - 8932 // kyle_reidy@prodigy.net // kreidy.me

EDUCATION

University of California, Los Angeles (UCLA)

Bachelor of Science, Major in Computer Science, Minor in Theater

Los Angeles, CA

June 2020

- GPA: 3.7
 - *Selected Coursework:* Web Applications | Database Systems | Computer Graphics | Art and Process of Entertainment Design | Emerging Technologies in Live Performance
-

SKILLS

Languages: C++ | C | Java | Kotlin | Swift | JavaScript | TypeScript | Python

Web & UI: React | React Native | Redux Toolkit | Node.js | SCSS | Angular

Cloud & Infrastructure: AWS Lambda | AWS SQS | AWS CDK

Testing & More Tools: Cypress | Jest | Git | Perforce | Jira | Unreal Engine

EXPERIENCE

Amazon Music

San Francisco, CA

Software Development Engineer II, Visual Engagement

November 2025 to Present

- Develop end-to-end features across native iOS and Android applications and a shared React Native package for Free and Prime tier customers.
- Build reusable TypeScript UI components and custom hooks, including experiment-driven UI behavior and responsive interfaces.
- Collaborate with Product and Design teams and engineers across dependent services to identify and prioritize customer-facing improvements.
- Maintain high standards of code by participating in code reviews across multiple codebases.
- Support the team's on-call rotation to investigate, diagnose, and resolve issues reported in production.

Software Development Engineer II, Monetization

February to November 2025

- Developed features for Music Ads Experience Service (a Java service on AWS ECS), supporting advertisement configuration and delivery, while also contributing to the service's CI/CD pipeline.

Amazon, Global Security Operations

Irvine, CA

Software Development Engineer I

September 2022 to February 2025

- Developed React and TypeScript applications for emergency response, incident management, transportation emergencies, and workplace threat management.
- Built reusable React components, Redux Toolkit state management, custom hooks, and REST API integrations across multiple applications.
- Built Cypress UI integration tests and CI/CD promotion gates, including a production UI canary that ran scheduled tests against a protected production application.
- Improved frontend accessibility and built responsive layouts for desktop and mobile experiences.

Heavy Iron Studios (A Keywords Studio)

Manhattan Beach, CA

Associate Game Programmer

March 2021 to September 2022

- Programmed in C++ and Unreal Blueprints to develop features and fix bugs, primarily in gameplay and UI, for Fortnite's Creative mode, a high-profile game with millions of players and frequent content updates.
- Collaborated with artists, designers, producers, and QA to deliver polished player experiences.
